From Director General's Desk

I am extremely delighted on the publication of Quarterly News Letter, MIT, Vol. 2, Issue 1, comprising the important events and achievements of the institute during January - March 2015. This newsletter is the platform, representing the creativity of the students and staff of MIT. The last two decades have witnessed a phenomenal change in the global professional landscape. A successful professional ought to be capable of identifying future trends and opportunities beyond foreseeable boundaries and develop strategic vision on the grounding of in-depth knowledge and professional acumen. Multi-disciplinary growth oriented quality education based on research and innovations is the need of the hour. MIT is making appreciable contribution in this direction by providing congenial environment and good infrastructural facilities to the students.

Apart from quality teaching from skilled faculty members, workshops and guest lectures of experts from industry and academia are organized time to time. The faculty members and students are motivated for research and innovation. A large no. of research papers published by the faculty members is the testimony of this fact.

A moment of great pride for all of us is that MIT has been conferred with prestigious “Dr. Ram Manohar Lohia Award” by MSEM & Department of Export Promotion, Govt. of U.P. for outstanding performance in service sector on 22rd January 2015. This newsletter is the panorama of all such accomplishments that bring us pride and pleasure and inspire us to achieve more milestones in future.

I sincerely thank MIT Management for the support and motivation in bringing out this marvelous issue. I appreciate the strenuous efforts made by the Editorial Board for the publication of the newsletter.

I extend my warm wishes to all of you.

Shaktidev Mukherjee
Director General, MIT

From Chief Editor's Desk

I am exuberated to present before you the Quarterly News Letter, MIT, Vol. 2, Issue 1, April 2015. MIT is always on its voyage to transcend excellence in the field of technical education along with holistic development of the students. MIT occupies a very high rank among the engineering colleges of India. MIT follows unique pedagogical methodology with optimum fusion of academics and co-academics, leading to the growth and development of the students. The aim of our alma mater is to prepare the students to face the challenges of life and mould them into civilized and better citizens. “All work and no play makes Jack a dull boy”. At MIT various sports and cultural meets are organized to keep the student’s mind active and energetic. These activities not only develop the interpersonal and leadership skills in students, but also fill their minds with positivity. While cultural meets keep them connected with their culture, the sports meet keep them physically fit.

This newsletter is intended to showcase the skills and caliber of the students and potential of faculty members. The outside world will come to know about their caliber through this medium. I wish to express my sincere thanks to MIT Management and the Director General Prof. (Dr.) S. Mukherjee for encouragement and value support given by them. I sincerely thank to the Heads of the Departments, members of the editorial team and all those, who have contributed in the publication of the newsletter. At the end I would like to look forward your valuable feedback.

With Best Wishes to All...

Sangeeta Mahesh
Asst. Professor, MIT, Moradabad
